STUDENT WELFARE SUPPORT SERVICES

"BE YOUR BEST"

St. Patrick's College has a team of people available to assist students and families who have additional needs or concerns. This support is provided within an inclusive and caring environment by qualified professional staff.

The experience of accessing support services aims to be positive, powerful and enriching for students and their families. The focus is on developing independence for learning and life.

Support Service staff work with the students, parents, tutors, teachers and other professionals, where appropriate, to provide specialist knowledge, skills and experience to enhance provisions and programs for individual students with additional needs.

The services of support staff are free and available to all members of the St. Patrick's College community.

Enquiries can be directed to any member of college staff or directly to the Student Welfare Support Service Co-ordinator.
